

Readout Error Mitigation (2)

Comparing Two Fold vs Three Fold Majority Logic

November 3, 2020 (Election Day!)

Example of Three Fold Majority Logic

- After the transformation shown on the side, only symmetric outputs (like '010101' but not '000111') are accepted

Regular Range $(-\pi, \pi)$

Full Noise Model

Two Fold Majority Logic

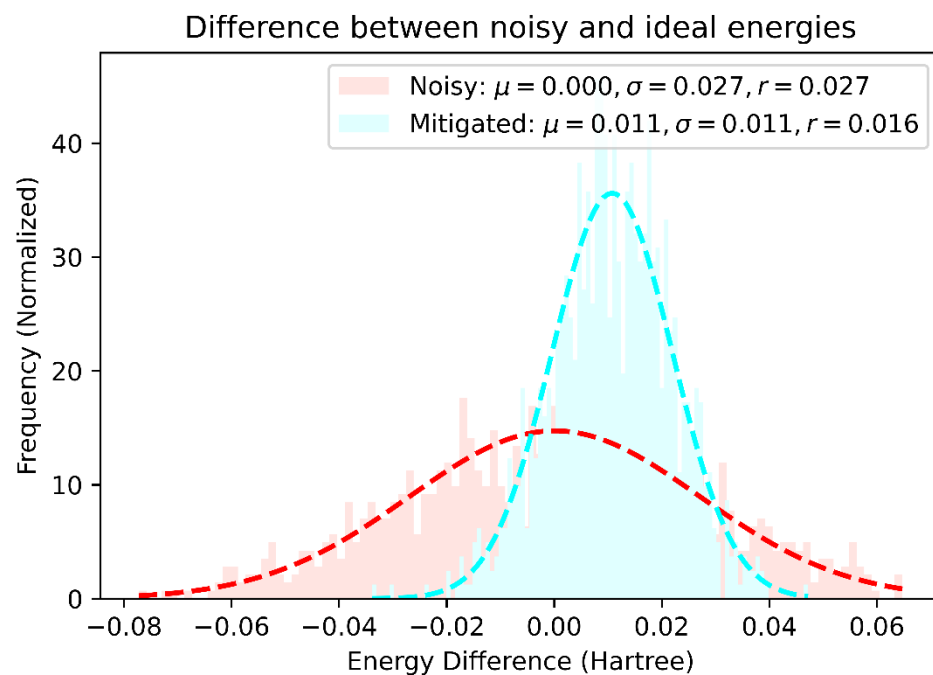

Three Fold Majority Logic

Regular Range $(-\pi, \pi)$

Only Readout Errors

Two Fold Majority Logic

Three Fold Majority Logic

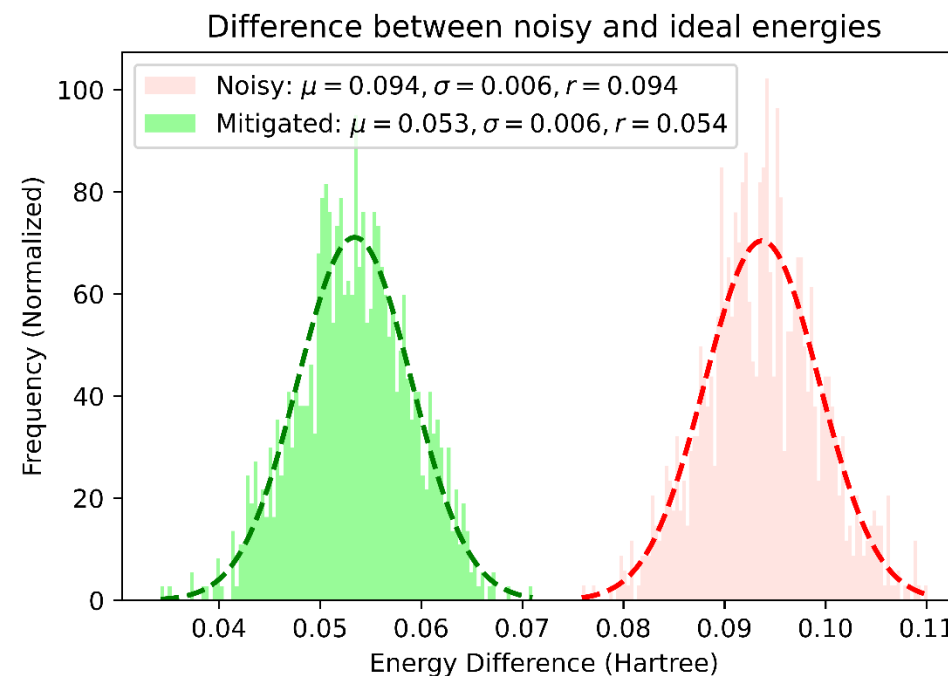

Restricted Range $[(0.001, 0.002), (-0.002, -0.001), (-0.2, -0.1)]$

Full Noise Model

Two Fold Majority Logic

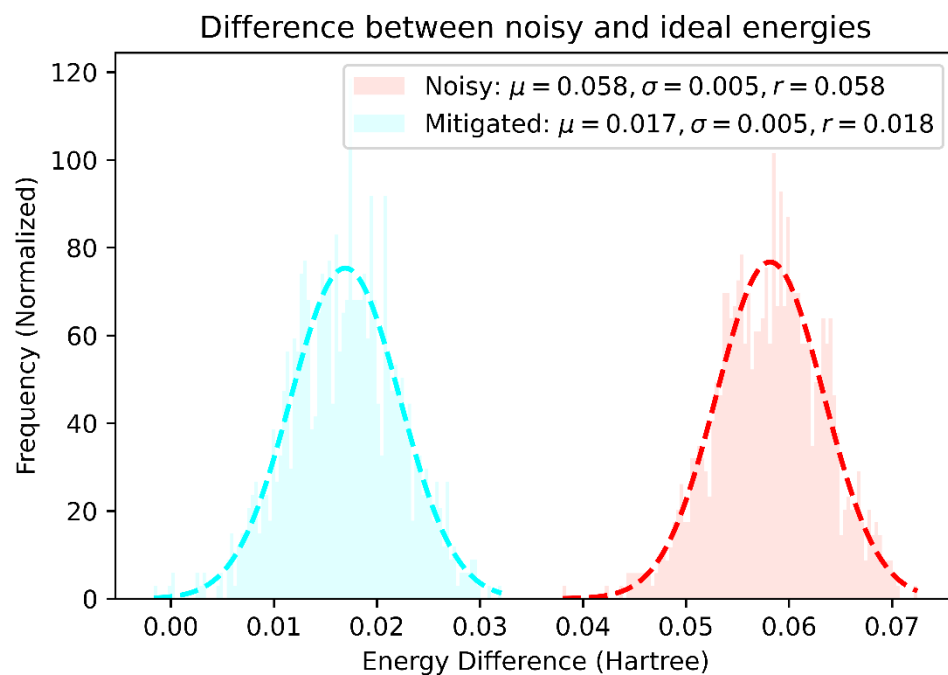

Three Fold Majority Logic

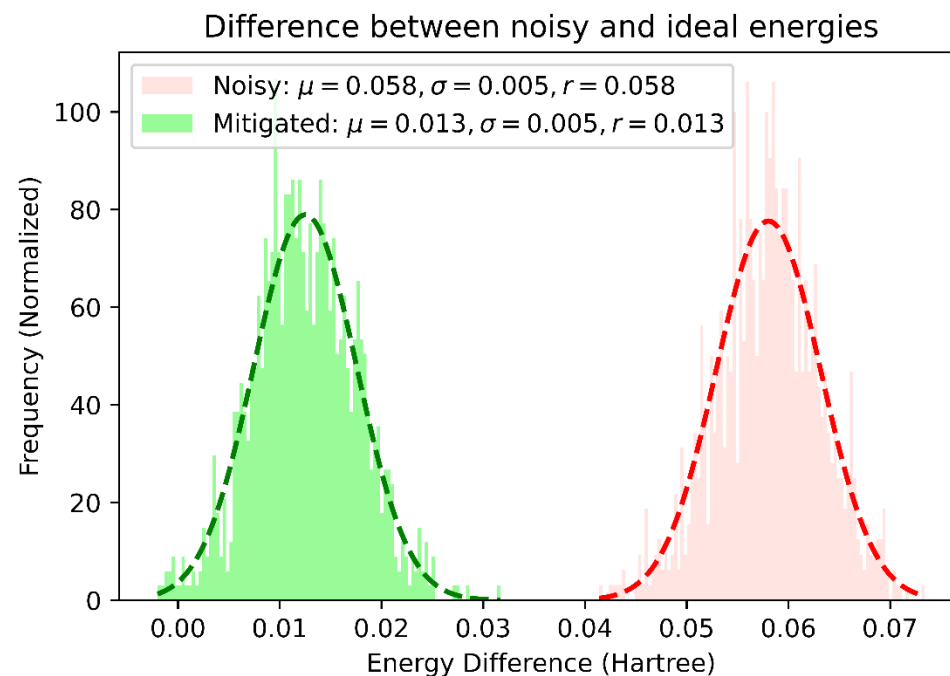

Restricted Range $[(0.001, 0.002), (-0.002, -0.001), (-0.2, -0.1)]$

Only Readout Errors

Two Fold Majority Logic

Three Fold Majority Logic

Optimized Parameters [0.00172129,-0.00182397, -0.11217598] Full Noise Model

Two Fold Majority Logic

Three Fold Majority Logic
